Never has a bigger lie been told to Australia by its leaders than the gross exaggeration of the COVID pandemic. While covid has been a moderate pandemic, it is not the Spanish flu but vastly smaller in magnitude. Prof. John Ioannidis of Stanford University – the most heavily cited epidemiologist in the world – has confirmed to me via email on 9 April 2022 that COVID is 50-500 times smaller than the Spanish flu. Daniel Andrews has lied to us from day one. Matthew Guy has supported every lie of Andrews. The Labor and Liberal parties are unfit to govern.

Never has greater harm been caused by Australian governments. A cost-benefit analysis of lockdowns published on 11 May 2022 by Prof. Gigi Foster of the University of New South Wales shows that lockdowns (copied entirely from communist China, forbidden by Australia's pandemic plans) have caused at least 36 times more harm than any benefit.

I'm the economist who resigned from the Victorian Government Treasury department in September 2020 to protest the Police State created in Victoria by the Labor Party. **If you can spare 10 minutes, please listen to the speech I gave at the Doncaster Church of Christ on 11 May 2022 – see the link on the left.**

Sweden had no lockdowns, no border closures, no mandatory masks. Its population should have been devastated. BUT:

Don't trust me! You can download this information yourself from Sweden's official website: <https://bit.ly/38zCqra>

The UK government declared to its Parliament on 27 August 2021 that the infection fatality rate of COVID was **0.096%**. That is exactly the same as that of the seasonal flu (check UK parliament website yourself: <https://bit.ly/3tXsTCE>).
